DETAILED ACTION

Amendment Entry & Claims Status

The amendment filed on November 10, 2006 has been acknowledged and entered.

Claims 1-24, 26-39 are pending.

Withdrawn Rejection(s)

Rejections under 103 in the previous office action are withdrawn herein.

New Grounds of Rejection

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-24, 28-39 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a viscous solution such as agar, agarose, methylcellulose or polyacrylamide, does not reasonably provide enablement for all other viscous solutions such as blood, glycerol solution or enzyme solution. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make/use the invention commensurate in scope with these claims. Viscous solutions encompass different solutions other than those defined in the present specification, e.g. agar, agarose, polyacrylamide, methylcellulose. Viscous solutions can include blood, glycerol solution or enzyme solution. However, the present invention fails to provide enablement for these viscous solutions.
